Charm bracelets are back in style

Unlike the charms of the 50s which were personal and nostalgic, today's charms are whimsical, fun and stylish. They are created specifically to match palettes moods and genres. So you don't have to just settle for silver or gold anymore.

What are the health risks?

Warts and nail fungus are the most common infections from manicures and pedicures when you go to a salon. Fungi or viruses are from the instruments at a salon and warts are from customers who were ahead of you. Infections come from breaking the skin, so you may want to skip the cuticle-clipping. When choosing a salon, look for the licenses, technician certification and the approval from the health department.

You came to the salon for a manicure, not for warts or fungus. If you're careful, the only thing blooming on your fingers will be those fake flowers.

Look good and help the environment too

Organic nail polish and nail polish remover is available and comes in a variety of colors and is offered in three-pack sets just in time the autumn season.
