There's A Pill to **Prevent HIV**

But not everyone knows what it is or how to get it.

HIV prevention pill is not reaching most who could potentially benefit – especially African Americans and Latinos

44%

of people who could potentially benefit from PrEP are **African American** – approximately 500,000 people...

...but only **1%** of those – **7,000 African Americans** – were prescribed PrEP*

25%

of people who could potentially benefit from PrEP are **Latino** – nearly 300,000 people...

...but only **3%** of those – **7,600 Latinos** – were prescribed PrEP*

*Prescription data in this analysis limited to those filled at retail pharmacies or mail order services from September 2015 – August 2016; racial and ethnic information not available for one-third of the prescription data

WNCAP is working with community partners to raise awareness about the availability of **PrEP**.

If your organization would like to host an educational session, please email info@wncap.org

PrEP, or pre-exposure prophylaxis, is a **daily pill** that can reduce the chance of getting HIV from sex by up to **90%**.

For more information about **PrEP**, referrals to providers, and available **financial assistance**, please call WNCAP at **(828) 252-7489**

"Closing gaps is an important step for PrEP. CDC is committed to equipping providers and all people living with and at risk for HIV with the information and support needed to maximize the impact of PrEP and all proven strategies."

– **Eugene McCray, MD**, Director of CDC's Division of HIV/AIDS Prevention

U.S. Department of Health and Human Services
Centers for Disease Control and Prevention

SAVE THE DATE

WNCAP will host a free community lunch in honor of **World AIDS Day** on Sunday, December 1st, 2019
